Nagami's synthesizer spews a volcanic flow of notes like homing magma.. "They've got practically all their strength out on the flanks both ways along the gorge," Swyley announced. "There are some units moving down the opposite slope, but they won't be in position for about another thirty minutes." The glow from the screen highlighted the mystified look that flashed across his face. He shrugged. "Right now they're wide open, right down below us." "Will you pipe down in there," called the jailor without opening his eyes..savages?" He shrugged..choose which two or three to save in the time she had. It was a simplified version of the prototype, with only two controls, one for space, one for time. The range of the device was limited to one thousand miles. Nowhere on the casing of the device or in the instruction booklet was a patent number or a pending patent mentioned. Smith had called the device Ozo, perhaps because he thought it sounded vaguely Japanese. The booklet described the device as a distant viewer and gave clear, simple instructions for its use. After the meeting a bunch of us stopped in The Fig Leaf for a few beers. I was still there when Ike got off picket duty and dropped by. I told him about the package and he agreed it was a nice one. By that time the drinks were coming pretty fast, and an argument had broken out down the bar between one of the bricklayers and one of the brickmakers about the free foot clinic. The bricklayer said that if they were going to furnish a free foot clinic, they should furnish a free hand clinic too, because a bricklayer was as liable to develop arthritis in his hands as a brickmaker was in his feet and in addition was performing a much more essential task. The brickmaker asked him how he'd perform it without the bricks the brickmakers made and said he'd like to see him slog around in mud and straw eight hours a day and see how his feet felt come quitting time. The bricklayer said that where he came from the women did the slogging, and the brickmaker said that that was just the kind of a place a labor-faker like him would come from. Somebody broke it up just in time. That stopped me for a minute, but I'm not sure why. I must've had a mental picture of Charles Laughton riding those bells or Igor stealing that brain from the laboratory. "He's good-looking and he's a hunchback?" 165. The farther eastward, the more he has to tilt. lowland meadows to graze..more have thought of looking inside than of lifting Madeline's skirts to peek at her underclothes. "What's possible?" First, there is the reactive pain. Only those who have reviewed, year in and year out, know how truly abominable most fiction is. And we can't remove ourselves from the pain. Ordinary readers can skip, or read every third word, or quit in the middle. We can't We must read carefully, with our sensitivities at full operation and our critical-historical apparatus always in high gear? or we may miss that subtle satire which disguises itself as cliché, that first novel whose beginning, alas, was never revised, that gem of a quiet story obscured in a loud, flashy collection, that experiment in form which could be mistaken for sloppiness, that appealing tale partly marred by (but also made possible by) naivete, that complicated situation that only pays off near the end of the book. Such works exist but in order not to miss them, one must continually extend one's sensitivity, knowledge, and critical care to works that only abuse such faculties. The mental sensation is that of eating garbage, I assure you, and if critics\* accumulated suffering did not find an outlet in the vigor of our language, I don't know what we would do. And it's the critics who care the most who suffer the most; irritation is a sign of betrayed love. As Shaw puts it: When I came out she said, "Why?" She waited through the whole of the long morning, till the sun was high overhead. Not until then did she go indoors, where she threw herself down on the straw bedding and wept. they are connected to our central computer.
