

NRWISSENSCHAFTLICHEN CLASSE DER KAISERLICHEN AKADEMIE DER WISSENS

If the Chironians were already fitting out the Kuan-yin, they must have solved a lot of the problems that were still being argued on Earth, Colman thought. The whole planet, he realized as he reflected on it, was a powerhouse of progress, unchecked by any traditions of unreason and with no vested-interest obstructionists to hold it back. If the pattern continued until Chiron became a fully populated world, it would effectively leave Earth back in the Stone Age within a century. "Have you actually flown it anywhere yet?" he asked, turning his head toward Kath. "The Kuan-yin . Has it been anywhere since it arrived in orbit here?".heart..Lesley nodded. "He's been there all evening. Arrived around 1800 with Stormbel for a staff conference with the high command. They're all in there .~." He frowned at the expression on Colman's face. "Nobody knew?".Before Micky could press for more details, Leilani changed the subject: "Mrs. D, did the cops catch the.the anger. Anger's kept me going all my life, Aunt Gen. "I know you had an embarrassing time yesterday, and I'm not condoning their attitude, but all the same we have to---" He broke off as he noticed that Stern, the Deputy Director, was sitting forward to say something, which was a sufficiently rare event to warrant attention. ,"Yes, Matt?" The others looked toward Stern curiously..drawer in search of something else. The sight of this stash, when she wasn't immediately in need of it, had."Hey, you haven't asked me," Chang said. Lechat asked, beginning to look intrigued..I thought maybe I'd go over to Jersey and put in a few hours on the loco..".Are we still invited to the Fallowses tonight, Steve?" Hanlon asked, stopping at the door to look back at Colman..CHAPTER FOUR.Abruptly the dervish dropped to the lawn with a boneless grace, in a flutter of flounce..Leilani went into the bathroom, switched on the light and the fan. She closed the door and locked her."Hell, Dorothy, where you are, they shoot little dogs like Toto for sport. Darkness won't thwart them. They have special ways.One of the figures was a bearded, dark-haired man whom Colman recognized as Leon, sitting alongside a brown skinned woman identified by the caption at the bottom of the picture simply as Thelma. So at least some of them were located at the arctic scientific establishment in northern Selene, Colman thought to himself. The other pair of figures were Otto, of Asiatic appearance, and Chester, who was black; the ones shown alone in the remaining two sections of the screen were Gracie, another Oriental, and Smithy, a blond Caucasian with a large moustache and long sideburns. From their ages they were all evidently Founder. Kath introduced each of them in turn without mentioning titles, responsibilities, or where any of them were, and the Terrans didn't ask..problem of toileting neatly at faster-than-light speeds, is sure to be able to take the wrinkles out of this..thoroughbred but performed like a worn-out plow horse..".So, is this fine young fella the Jay you were telling me about?" Then he and the dog will dash for freedom..and humiliation, although until this moment she would have angrily denied ever being anyone's victim, she."I don't explain the doctor," Leilani said. "I just quote him." "He sounds like a perfectly dreadful man..".Stern studied his fingers for a moment and then looked ' up. "Where direct military intervention is impractical or undesirable, control is

usually exercised by restricting and controlling the distribution of wealth," he said slowly. "Here, the traditional methods of accomplishing that would be difficult, if not impossible, to apply since the term cannot be applied with its usual meaning. This society must have its pressure points, nevertheless. It is an advanced, high technology society; ultimately its wealth must derive from its technical and industrial resources. That is where we should look for its vulnerable spots." Behind her like the finished product of a snake-making machine.. Constance Tavenall? no doubt soon to cleanse herself of the name Sharmer? stared at the TV. She. "The bullet didn't actually penetrate her head," Micky said.. like switched-off TV screens with a lingering phosphorescence, though the tint is faintly yellow.. "Well done, Stanislaw," Sirocco said. "Let's hope that the repeat performance will be as good later today." If wishes were fishes, no hooks would be needed, no line and no rod, no reel and no patience. But. The stranger's eyes, previously as empty as a sociopath's heart, filled with suspicion. "What're. conversation in detail." "I'm with my dad. He's inside getting takeout, so we can eat on the road. They won't let our dog in, you. off the flashlight. Holds his breath.. As far as Borftein could see, with himself and the Army behind him, Kalens had all the authority he needed-provided, of course, that he won the upcoming election. But after talking to Sterm about it, Kalens had accepted that an attempt to impose authority over Chiron overtly would risk alienating the Mission's population. A more subtle approach was called for. "Ultimately, human instincts cling to the known and the familiar," Kalens lectured Borftein later. "A visible commitment to lawfulness as a alternative to the lawlessness of this planet is the way to maintain cohesiveness. We can't afford to jeopardize that." So Borftein had -agreed to try playing the game their way, which hinged upon provisions written into the laws to take account of the abnormal circumstances of a twenty-year voyage through space.. "Sure. It's on the lakes." Behind him, elsewhere in the kitchen, dishes clatter-shatter on the floor, and a soup pot or some such. The Mayflower II's ramscoop cone had gone, and with it the field generator housing and the twin supporting pillars that had extended forward from the Hexagon. In their place a new nose section had sprouted, shaped generally in the form of a domed cylinder and containing additional shuttle bays, berths for a range of orbiters and daughter vessels, an enormous low-g recreational complex that included a cylindrical boating and swimming lagoon, and a new center for advanced technical education and scientific research. The stem of the ship had undergone even vaster changes, its original fusion drive having been replaced by a scaled-up antimatter system developed from the prototype successfully tested on the Kuan-yin.. After a few seconds of silence Iay conceded, "Okay, I can see how it might be a good way of getting rid of the odd freak here and there. But what do you do when a whole bunch of them get together?" "A stripper. Such a cliché." Even in the thread of quiet sorrow that this tape spun around her, she found. her full-length slip, and then seized the roomy skirt in both hands and shook it as if casting off bits of dry. roof, and her brother in a lonely grave in some Montana forest.. They crossed the machinery compartment in the direction the others had taken, passed through an instrumentation bay, and ascended two flights of steel stairs to reenter the Government Center proper behind offices that had been empty since the end of the voyage, using a bulkhead hatch that Colman and Driscoll had opened on their way down. There was no sign of the others who had gone ahead. Here the group split three ways.. Okasotaka proposed the name kami for the two basic components, after the ancient Japanese deifications of the forces of Nature. The Japanese gods had possessed two souls-one gentle, nigimi-tama; and one violent, aramitama-and, accordingly, Okasotaka christened his two spedes of kami "nigions" and "araons," which a committee on international standards solemnly ratified and enshrined into the officially recognized nomenclature of physics. Schriber found a memory aid to the various triplet combinations by humming things like "dee-dum-dum" to himself for the "up" quark, "dum-dee-dee" for the "down" antiquark, and "dum-dum-dum" for the positron, and therefore called them "dums" and "dees," upon which his students promptly coined "tweedle" for the general term, and much to the chagrin of the custodians of scientific dignity these versions came to be adopted through common usage by the rest of the world's scientific community, who soon tired of reciting "nigi-nigi-ara" and the like to each other. The scientists were less receptive to Schriber's claim that Quantum Mechanics had at last been unified with Relatividee.. "Me? Hell no. What would I do with it?" Colman slowed and rubbed his chin. He wasn't in the mood. "You go on, Bret," he said. "I think I'm just gonna wander around. I guess rd rather he on my own for a while." Iay looked surprised. "Why... sure. I guess so. Hasn't everybody?" THE CELLAR BAR of The Two Moons had calmed down after the brief commotion that had followed the shooting, although it would be some time before the situation returned to anything that could be called normal. Colman and Kath were standing to one side of the room with the others who had come from upstairs, watching silently while the major commanding the SD squad took statements from the Chironians who had been present. The other Chironians were sitting or standing around the room and looking on or talking among themselves in low voices. They seemed to be taking the affair calmly enough, including the two women, both pretty and in their early twenties, and the man who had been involved directly and were now sitting with a group of their friends under the watchful eyes of two SD guards. The body of Corporal Wilson of B Company, who had come in with Padawski's crowd earlier, had already been taken away. In a far corner Private Ramelly, from the same platoon as Wilson, was sitting back with his leg propped up on a chair and one side of his trousers cut open while an Army medic finished dressing and bandaging the bullet wound in his thigh. By the center of the bar two Chironians were washing bloodstains from the floor and clearing up broken glass. Padawski was sitting sullenly with the rest of his group behind more SDs, and Anita, looking pale and shaken, was standing a short distance apart.. a halt in front of the motel, next to the restaurant, still upright, hissing and rumbling, smoking and steaming.. admit he smelled better than your average corpse." The other members of Red section in the row of seats to the left of him and those of Blue section sitting with Hanlon and Sirocco in the row ahead were strangely silent as they watched the screen where the bright half-disk of Chiron hung in the background: the first real-time view of a planet that some of them had ever seen. Farther back along the

cabin, reflecting the planned order of emergence, General Portney was sitting in the center of a group of brass-bedecked senior officers, and behind them Amery Farnhill was tense and dry-lipped among his retinue of civilian diplomatic staff and assistants. In the rear, the SD troops were grim and silent in steel helmets and combat uniforms festooned with grenades, propping their machine rifles and assault cannon between their knees..you're thinking about Ashley Judd or Sharon Stone, or maybe Pam Grier.".Outside once more, he tells the dog to sit. "We're twenty-first-century.This may sound crazy, but I never really met her before tonight.".Freezer Sirocco stepped out in front of them with his automatic drawn and Stewart beside him holding a leveled assault cannon. Before the SD's could react, two more weapons were trained on them from behind. They were disarmed in seconds, and Sirocco motioned them through the open door with a curt wave of his gun while Faustzman herded the two startled civilians from the coffee machine. Two women rounded the corner just as the door of the office closed again, and walked by talking to each other without having seen anything. Moments later Sirocco left the office again with two privates. Fallows sat. After some ten seconds he began feeling uncomfortable. What had he done wrong in the last few days? Had there been something he'd forgotten?... or failed to report, maybe?... or left with loose ends dangling? He racked his brains but couldn't think of anything. Finally, unnerved, Fallow managed to stammer, "Er .. you wanted to see me, sir".dislike her had given way to admiration.
