A last sob clogged her throat, and."Not worth screwing around with," Walters declared. "With three months to go we might ~just as well cut in the backup and to hell with it. Fix the thing after we get there, when the main drive's not running. Why lose pounds sweating in trog-suits?'.INSIDE THE LOCAL command post behind the Hexagon's armored bulkhead, Major Lesley of the Special Duty Force was still too stunned by what he had heard to be capable of a coherent reaction for the moment. He stared at the companel where a screen showed a view from the Columbia District, where the SD guard commander had entered the Communications Center under a truce flag some minutes previously to talk with Borftein, and tried to separate the conflicting emotions in his head. Captain Jarvis, Lesley's adjutant officer, and Lieutenant Chazurez watched in silence while around the command post the duty staff averted their eyes and occupied themselves with their own thoughts. His dilemma was not so much having to choose between conflicting orders for the first time in his life, for their order of precedence was plain enough and he had no duty to serve somebody who had usurped rank and criminally abused the power of command, but deciding which side he wanted to be on. "You'd better believe it?'.The aircraft touched down softly, and a pair of double doors slid open halfway along the side nearest to the reception party. A tall, burly, red-bearded Chironian wearing a dark parka with a thick belt buckled over it jumped out, followed by another, similarly clad but more slender and catlike. More figures became visible inside when the cabin light came on. Laid out neatly along the floor behind them were two rows of plastic' bundles the size of sleeping bags..Chapter 2.It was after 0400 hours, local, when Colman returned to the room which he shared with Hanlon in the Omar Bradley Block, which in the system of twenty-four Chironian "long hours" day was about as miserable a time of day as it was on Earth. With the room to himself since Hanlon was on night duty, he crawled gratefully between the sheets without bothering to shower to make what he could of the opportunity to sleep undisturbed until his call at 0530..when it struck the floor and tumbled, lashing angrily, as though mistaking its own whipping coils for those.course, Haley Joel Osment, who was cute, sensitive, intelligent, charming, radiant, divine..The dog peers at something in the oily Muck gloom under the big truck. It might do you a lot of good." Celia shook her head. Jean nodded resignedly and replaced the pot on the warmer before sifting down again between Celia and Marie..How long before the Kuan-yin is eclipsed?" Sterm asked, looking across at Stormbel, who was supervising the preparations to detach. He had intended taking advantage of the Mayflower II's cover until after the strike was launched, but the unexpected loss of the rest of the ship, coupled with Lesley's treacherous change of sides in the hexagon and the arrival of assault troops outside the Battle Module itself had forced him to revise his priorities. There would be lime point in destroying the Kuan-yin if he lost the Battle Module in the process..Major Lesley shook his head slowly and continued to stare ahead with a vacant look in his eyes. "This shouldn't be happening," he murmured. "They're not the enemy. They shouldn't be fighting each other."..Retreating quickly and silently from the bedroom, the boy sees movement in the hall, a pair of shining.He can only imagine the daunting quantity of energy required to be Donella, the waitress whose.the mothering. "You're nine, huh?".OUTSIDE DAWN WAS creeping into the sky as Stanislaw sat before a portable communications panel in one corner of the mess hall of the Omar Bradley Block, frowning at the mnemonics appearing on the screen and returning coded commands with intermittent movements of his fingers. Sirocco was watching from below the platform that he had been using for the briefing, while the rest of I) Company, many of them in flak vests and fatigue pants, sat talking in groups or just waiting among the rows of seats scattered untidily to face the platform. The doors and approaches to the building were all covered by lookouts, so there was no risk of

surprise interruptions..weary in body, mind, and spirit. And her emotional unsteadiness scared her..At a table stacked with clean plates, Curtis stops and, though still crouching, dares to raise his head. He. Then, slowly, she realized what her mind had responded to unconsciously in the faces of the three children in the Chironian sculpture. The artist had been not merely an expert, but a master. For fear was there too, not in any way that was consciously perceptible, but in a way that slipped subliminally into the mind of the beholder and gripped it by its deepest roots. That was why she had felt disturbed all the way back from Franklin. But there was still something else. She could feel it tugging at the fringes of awareness-something deeper that she hadn't grasped even yet. She turned her eyes to the sculpture again..scar tissue..Leon nodded gravely from his section of the screen. "That is a risk," he agreed. "As Otto said, it is difficult to judge exactly. However, we think that the policy we have outlined minimizes risks to the majority of people. Nothing will eliminate the risks completely." He drew a long, heavy breath before answering Bernard's question directly. "But there can be no alteration of our resolution." And as she gazed, she discovered what the children were awaiting as it loomed nearer and more terrifying from afar. The realization tightened her stomach. Even from fifteen years ago... it was she--for she had come with the Mayflower H. She knew then that the Chironians were at war, and that the war would end only when they or those sent to conquer them had been eliminated. And in their first encounter, she had sensed the helplessness of her own kind. She felt it again now, as the final veil of the artist's enigma fell away and revealed, behind the fear and the trepidation, a glimpse of something more powerful and more invincible than all the weapons of the Mayflower II combined. She was staring at her own extinction..penetrating, as air finds its way into places from which water is kept out. "He can't have been here ten.those fangs in her cheek or her nose. THE CHIRONIANS' HANDLING of the Padawski incident and the absence of any organized reaction among them to the initial Terran hysteria led to a widespread inclination among the Terrans privately to absolve the Chironians of blame over the bombings, but the Terrans avoided thinking about the obvious question which that implied. The aftertaste of guilt and not a little shame left in many mouths alienated the Terran extremists from the majority, and relations with the Chironians quickly returned to normal. Nevertheless, the wheels that had been set in motion by the affair continued to turn regardless, and five days later the Territory of Phoenix was declared to exist..and tire iron. A new light was creeping into Bernard's eyes as the implications of what Kath had said began to sink in. Jay hesitated, then decided that his father was in the fight mood. "You know, this is a bit of a risky place, Dad," he said in an ominous voice. "People getting shot all over the place and stuff like that. I could run into all kinds of trouble on my own. I'm sure you'd feel a lot happier ff I had some professional protection." "I never said they'd do anything," the robot replied. "I just said that people telling them wouldn't bother them." "Aha" Merrick seemed more satisfied. "I certainly don't want my name going on record associated with something like this." His statement said as clearly as anything could that Fallows wouldn't do much for his future prospects by allowing his own name to go into such a record either. Merrick screwed his face up as if he were experiencing a sour taste. "Low-echelon rabble trying to rise above themselves. We've got to keep them in; their places, you know, Fallows. That was what went wrong with the Old Order. It let them climb too high, and they took over. And what happened? They dragged it down-civilization. Do you want to see that happen again?" The silk-textured light, as red as Sinsemilla's favorite party blouse, barely brightened the nest of shadows."I agree," Howard Kalens murmured..Then: big trouble.."Oh, that locomotive!" lean looked at lay. "Are you working on it again?".Curtis pushes away from the car and turns just as Old Yeller, no longer barking savagely, leaps out of.."Detail ... stop" the girl called out. The robot halted. "Detail . . . Oh, I don't know what I'm supposed to say. Stand with your feet apart and put your gun down." The robot pivoted to face directly at Driscoll, backed a couple of paces to the opposite wall, and assumed an imitation of his stance. The top half of its head was a transparent dome inside which a row of colored lights blinked on and off; the lower half contained a metal grille for a mouth and a TV lens-housing for a nose; it appeared to be grinning..At the front of the vehicle, the door opens, and the first things through it are the excited voices of a man.Jay thought about it for a few seconds and nodded slowly. "I think I get it. You're saying that the ways people act and how they feel can't be described in terms of the chemicals they're made from. A DNA molecule adds up to a lot more than a bunch of disorganized charges and valency bonds. The way you organize it makes its own laws."..communicate with the spirit world, sometimes just talking to herself..Lechat picked up his fork again. "I never looked at it in quite that way. It's an interesting thought." He began eating again, then stopped and looked up. "I suppose that was how the first generation of them sought to gain individual recognition at the beginning ... when machines did all the work and our traditional ideas of wealth had no meaning. And it's become embedded in their basic thinking." He nodded slowly to himself and reflected further. "A completely different kind of conditioning, absorbed from the earliest years... based on recognizing individual attributes. That would explain the apparent absence of any group prejudices too, wouldn't it? They've never had any reason to feel threatened by other groups." "This July third, just passed, made eighteen years." "Is there a computer in the house?" Bernard called out. "At your service," a voice replied from the direction of the screen. "I answer to Jeeves, unless you want to {sake it something different." The voice changed to that of a girl speaking with a distinctive French accent. "Une petite francaise,

possiblement?" Then it switched to a guttural male--"Karl, ze Bavarian butler, maybe?"--to smooth tones---"Or perhaps something frightfully English might meet more with your approval?"--and finally back to its original American. "All planetary communications and database facilities at your disposal--public, domestic, educational, professional, end personal; information storage, computation, entertainment~ instruction, tuition, reference, travel arrangements, accommodations, services, goods, end resources, secretarial assistance, and consultancy. You name it, I can handle it or put you in touch with the right people."The party ascended the main staircase, at the top of."Acknowledged," the computer replied..It was the right thing to do. She collected her wits quickly, shouldered the roll at an angle across the hack of her neck, and followed him into the lounge. Colman went ahead to stand peering through tile doorway from one side while soldiers came and went in bewildering confusion and then he motioned her out suddenly. In a strangely dreamlike way she found herself being conveyed down. the stairway between two soldiers who were keeping up a steady exchange about something not being large enough and a typical screw-up somewhere, and then she was outside and crossing the rear parking area toward a personnel carrier standing a short distance back behind some other vehicles. Suddenly, without really remembering getting in, she was sitting in the cabin, ~figures materialized swiftly and silently from the darkness and jumped in after her. The last of them closed the door, the engine started, and she felt herself being lifted. Only then did she start shaking..bursting with potential in this rank, mildew-riddled bathroom. Leilani knew that many intelligent,."Yeah. And you're wearing a Hawaiian shirt. Plainclothes cops like Hawaiian shirts, 'cause you can hide.Unextinguished laughter shakes the skies. ? She always hoped to leave them thinking..Apparently neither as a reply nor as an expression of physical pain, the dancing woman let out a pathetic."And you're Corporal Swyley, who sees things that aren't there," Kath said, moving round a step. "Your Captain Sirocco told me about your ability. I like him. He told me about the way you ruined the exercise up on the ship too. I thought it was wonderful."."They must be, mustn't they," Mrs. Crawford agreed blissfully. She shook her head. "In some ways it seems almost criminal to take them, but..." she sighed, "I'm sure they'd just be wasted otherwise. After all, those people are obviously savages and! quite incapable of appreciating the true value of anything." Celia's throat tightened, but she managed to remain quiet. Mrs. Crayford fussed with her pile of boxes. "Oh, dear, I wonder if I should leave some of them here after all and have them picked up later. I'm not at all sure we can carry them the rest of the way with just the two of us."."Thingy schemin' up a scheme to get his Leilani mouse, lickin' his snaky lips. The unit was one of a hundred or so set in clusters of four amid palm like trees and secluding curtains of foliage which afforded a comfortable measure of privacy without inflicting isolation. The complex was virtually a self-contained community, and was known as Cordova Village. It included a large, clover-shaped, open-air pool and an indoor one by the gymnasium and sports enclosure; a restaurant and bar adjoined a spacious public lounge that doubled as a game room; for recreation a laboratory, a workshop, and art studios, all fully equipped; and an assortment of musical instruments. From a terminal below the main building, cars running in tubes and propelled by linear induction left for the center of Franklin in one direction, and for the shuttle base and points along the Mandel Peninsula in the other.. "Hell, that's no surprise to me," the red-haired man declares, but the tail of Curtis's shirt remains twisted.Veronica came back into the room and began picking up Mrs. Crayford's boxes. "It's all right. You stay there, Celia. I can manage." She saw the expression on Celia's face and smiled. Her voice dropped to a whisper. "I know--awful.. "I suppose not." Sirocco conceded, deflating with a disappointed sigh. After a second he looked up sharply again. "I'll do a deal with you though. Tell me after this is all over, okay?".Bernard gave Jay a stern look. "You don't expect us to believe that, surely. Now, tell us where this stuff came from. I want the truth. If you've been up to something, I'll be willing to write it off as nothing more than planet fall getting to your head. Now--are you sure there isn't something you want to tell us?". "They may be a handful," Adam added from across the room, "but they control the ship's heavy weapons. We've given them every chance, and we've encouraged as many people to get themselves out of it as was humanly possible. Our whole world is at stake. If they begin issuing threats or deploying those weapons, the ship will be destroyed. They' can be no changing that decision. It was made a long time ago."."If so, then Steve's section will have to try rushing it from the nose and taking it over inside. But that's only as a last resort, as I said." He looked across at Colman, who returned a heavy nod..This was true. Golden hair. Eyes as blue as gentian petals.
